NOTE SHEET

W.B.S.E.D.C.L. Sub. : Compulsory metered Irrigation (STW / SMP) connection

It has gathered that good nos. of permanent Irrigation connections (STW & Submersible Pump both) are still running in unmetered mode under different Customer Care Centres. Immediate action must be taken to provide meter against each of such existing unmetered Irrigation connection.

All such connections should be metered within August 2014 so that from September 2014 consumption month, all the Irrigation connection's bills will be raised with the Tariff of metered connection.

It has also to be ensured that in forthcoming Boro season, instead of short term Irrigation connection, all connections should be in the nature of "Permanent Metered Irrigation connection".

All concerned should therefore be instructed accordingly to plan and place their requisition for meter and associated materials early so that smooth arrangements can be made to provide permanent metered connections before the Boro season of 2014-15.

Strict compliance should be adhered.
