WBSEDCL

Circular No: 08

Dated: 27.11.2020

Subject: Revised Policy Guidelines towards Realization of the Infrastructural Cost for Electrification of housing Complex, Commercial Complex and Industrial Park (Govt/Non-Govt)

Ref: Earlier Circular No 18 dated 17.06.2014 of the Director (Dist): WBSEDCL

With an objective of optimum utilization of the installed capacity i.r.o existing as well as upcoming 33/11 KV Sub-Stations of WBSEDCL towards accommodating the load demand of new Housing Complex, Commercial Complex and Industrial Park (Govt/Non-Govt), the authority of WBSEDCL has been contemplating to review the existing Policy Guidelines issued vide Circular No 18 dated 17.06.2014 of the Director (Dist): WBSEDCL.

In order to avoid escalation of the unnecessary capital expenses for installations of new 33/11 KV Sub-Stations as well as to curb the ever-increasing running expenses, the review of existing bench mark towards installation of new Sub-Station is the need of the hour, provided the existing Sub-Station (s) would be able to cater the load-demand and technically viable.

It is also needless to mention that the Revised Policy Guidelines shall have the bearing with hassle free & prompt disposal of the cases related to new connections of Housing Complex, Commercial Complex and Industrial Park (Govt/Non-Govt) and will also help in boosting up the revenue collection of WBSEDCL.

It is also to be kept in mind, there are many cases where the proposed Project Areas are situated either at a location, where WBSEDCL needs to extend/build its electrical infrastructure including construction of new 33/11 KV Sub-Station or there is little scope to cater such huge load demand from the existing system. Therefore, the compulsion of constructing new 33/11 KV Sub-Station cannot be avoided, for which the land shall have to be provided by the applicant (s). Further, to collect the proportionate cost/full cost for building infrastructure cannot be discounted in line with the statutory provisions of the I.E Act 2003 (amendment up to date) and also relevant provisions of the WBERC.

However, if there is a necessity of construction of 33/11 KV Sub-Station to cater the load of the Housing Complex/Commercial Complex/Industrial Park (Govt/Non Govt) having estimated demand up to 3 MVA and the intending consumer is unable to provide the land for the construction of the 33/11 KV S/stn, those applications shall be processed as per regulation 4.4 of the notification no 46/WBERC dated 31.05.2010 and regulation 4.2 of the notification 53/WBERC dated 02.04.2013.

For the modalities towards realization of proportionate cost & observance of other formalities, having load demand below 1.5 MVA the existing Circular Vide No 175 dated 29.11.2019 of the Director (Dist): WBSEDCL shall be followed.

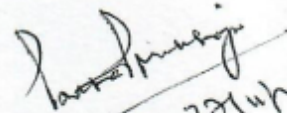

It has to be kept in mind that, the cases which have already been processed with handing over the land for the new 33 KV S/stn of Projects having load demand 1500 KVA or more (as per existing policy), the "Revised Policy" shall not be applicable and no adjustment/refund shall be allowed, under any circumstances.

In view of the above, WBSEDCL has taken a balanced approach in framing the "Revised Policy Guidelines" with immediate effect, in supersession of the earlier Circular No 18 dated 17.06.2014 of the Director (Dist): WBSEDCL, to dispose of the cases promptly and in time bound manner.

All concerned are advised to strictly adhere to the above direction as desired by the Company Management.

This has the reference to the approval of the Board of Directors during 94th meeting (item no 20) held on 12.11.2020

Encl: Detailed Guidelines

(P. P. Mukherjee)
Director (Dist)

Revised Guideline for Realization of the Infrastructural Cost from Housing Complex/Commercial Complex/Industrial Park (Govt & Non-Govt)						
Ref: Circular No. 08 dated 27.11.2020						
Sl No	Quantum of Power to be Utilized by the Applicant	Infrastructure to be Constructed	Conditions towards Distribution of Load	Cost to be Realized		
				33/11 KV Sub-station and 33KV Lines	11KV line & DTR	L&MV Line
1	Projected Load demand More than 3000 KVA & not below 75% of the Installed capacity i.r.o. any Housing Complex/Commercial Complex	Drawal of double circuit 33 KV line from the nearest EHT source & installation of 33/11 KV Sub-station of capacity 2X 10 MVA along with provision of 3rd 10 MVA Transformer in future	Consumers outside the complex would also be fed if load permits	Full Cost	Full Cost	Full Cost
2	Projected Load demand More than 3000 KVA & below 75% of the Installed capacity i.r.o. any Housing Complex/Commercial Complex	DO	DO	Proportionate Cost according to load demand to be realised	Full Cost	Full Cost
3	Projected load demand of any quantum i.r.o. any Industrial Park to be developed by any Govt. authority	DO	DO	No proportionate cost to be realised if the Industrial Park authority officially provide the land for 33KV Substation to WBSEDCL free of cost	Full Cost	Full Cost
4	Projected load demand of any quantum i.r.o. any Industrial Park to be developed by any Private developer/ authority	DO	DO	SAME AS HOUSING COMPLEXES/COMMERCIAL COMPLEXES		

 (P.P. Mukherjee)
 Director (Dist)

Sl No	Quantum of Power to be Utilized by the Applicant	Infrastructure to be Constructed	Conditions towards Distribution of Load	Cost to be Realized			Land
				33/11 KV Sub-station and 33KV Lines	11KV line & DTR	L&MV Line	
5	Projected Load demand 1500 KVA to 3000 KVA I.r.o. any Housing Complex/Commercial Complex, and there is necessity of a 33/11 KV Sub-Station at that area	DO	DO	No proportionate cost to be realised if the Housing complex/Commercial Complex authority officially provide the land individually for 33KV Substation to WBSEDCL free of cost in the close vicinity. For providing the land jointly proportionate costs as per their load demands of 33KV line and Sub-Station are to be realized from each developer.	Full Cost	Full Cost	To be provided to WBSEDCL officially free of cost by the Housing complex authority either individually or jointly with other developer in the close vicinity ,if found technically feasible.
6	Projected Load demand 1500 KVA to 3000 KVA I.r.o. any Housing Complex/Commercial Complex, and the existing 33/11KV substation and 33KV lines are capable of providing the load subject to technical feasibility and even if the augmentation of 33/11KV substation is required.	Power will be provided from existing 33/11KV substation and proportionate cost to be realised Rs 4729/- per KVA			Full Cost	Full Cost	Providing land for 33/11KV substation is not mandatory.
7	Projected Load demand less than 1500 KVA I.r.o. any Housing Complex/Commercial Complex						

To be Guided by the Circular No 175 , dated 29/11/2019 of Director (Dist)
