Circular No. : 10/2022

Dated: 07-06-2022

Subject: Process guideline to square up the 'ZMM_MAN_AGE' report.

Statutory Auditor of the Company has made a comment in their Audit Report for the FY 2020-21 that the value of the material received from vendors awaiting inspection is not accounted for. Auditor has put that comment based on the MAN (Material Arrival Notes) ageing analysis on pending SRV (Store Receipt Voucher) which is being generated from SAP-ERP system using customized T-code "ZMM_MAN_AGE".

Subsequently, a standing committee was formed for continuous monitoring of "ZMM_MAN_AGE" report. After examining line item wise system generated "ZMM_MAN_AGE" report by that committee, it is gathered that as per common and prevailing practice, store units do accept actual measured quantity in "MIGO" for drawl of the MAN/ SRV which may or may not be matched with PO (Purchase Order)/ DI (Dispatched Instruction) line item quantity. If the PO/ DI line item quantity is matched with the MAN/ SRV quantity then system automatically considered DCI (Delivery Completion Indicator). But if the PO /DI line item quantity is mismatched with the MAN/ SRV quantity then system is considered that line item as open though there is hardly any scope to receive the balance MAN quantity.

In order to get correct MAN age report in future and to streamline the previous MAN and pending SRV age report, the following points on receipt of store materials should be noted:

1. The DCI (Delivery Completion Indicator) can manually be set at MIGO by the Store- in-charge. The manual entry of a delivery completed indicator is a "soft" closure. If it is set, the open quantity will be zero and that will give correct MAN and pending SRV age report.
2. The DCI specifies that the PO line item is temporarily closed. This means that no more goods receipts are expected for that line item. If the DCI is set, the open PO for that line item quantity considered to be zero, even if the full quantity has not been delivered. However it is still possible to post goods receipts of remaining quantities, if required, by removing DCI.
3. The functionality of DCI should be understood properly. Even if the DCI flag is set, the system will still allow GR, to the extent of the open quantity. It is set in the PO line item for statistical purpose only. Meaning, when run the "ZMM_MAN_AGE" report, it will view the report as it is wanted. If there is any requirement to prevent GRs then PO needs to be amended. The DCI will not help to prevent GRs.
4. In real scenario if there are partial deliveries against any PO, it will allow to deliver for the remaining quantities even if it has set the DCI.
5. DCI does not have any impact on "ZDIREPORT" which is required to monitor the MAN, SRV status for entire PO.

To square up the "ZMM_MAN_AGE" report related to Audit Comments, henceforth all store in-charges are advised to put DCI in MIGO as a soft closure of line items of live POs where there is hardly any scope to receive the balance MAN quantity in subsequent occasions and for old inactive POs, DCI has to be activated by the concerned officer dealing the purchase of that particular item / items.

This guidance will take immediate effect for live POs and for old POs DCI flagging work need to be completed by 30.06.2022.

All concerned must adhere to the guidelines without deviation and all the controlling officers are hereby instructed to follow the instructions scrupulously and transmit the message to downstream, for necessary follow up.
