Sub: Shifting of bare HT/LT OH lines to a safe distance for maintaining mandatory horizontal & vertical clearance of buildings, of Govt. Schools, Colleges, Health Centres utilising any existing project fund.

Ref: i) Office order no. 1581 dt:27.02.2019 of the Director(HR), WBSSEDCL.

ii) Subsequent Circular on above dt:08.01.2020.

iii) Reminder issued against memo no. CMD/09/276 ddt:27.01.2020 of the CMD, WBSSEDCL.

Sir,

In connection with the subject as mentioned above his attention is being drawn to a great danger of general people in both urban and rural areas due to ongoing construction and extension of different buildings and other structures within the close proximity of the Low and High Tension overhead bare conductors. It seems that desperation and to some extent ignorance about the dangerous consequences of electrocution may be the probable reason for such regular violation of mandatory safety clearance in respect of construction of buildings without keeping in mind the safe distance to be maintained from the overhead electrical lines.

It seems that there are some important Govt. installations like, Schools, Colleges, Hospitals/ Health Centres etc, the premises of which is very close to bare HT/LT OH line, rendering the lives of the students, teachers, patients, doctors and associated others vulnerable to the danger of electrocution.

Under this situation it is advised for taking a stock of the existing field situation to identify if there is any such danger w.r.t any Govt. College/ School/ Hospital for shifting of the bare HT/LT OH lines to a safe distance for maintaining mandatory horizontal & vertical clearance from buildings. This can be done by utilising any existing project fund like SEEDN etc.

You are thus advised to identify such vulnerable locations considering the danger associated with the existing electrical power lines adjacent to the above mentioned Govt. buildings and initiate the appropriate course of action towards maintenance of the mandatory clearances from the existing HV and/or L&MV overhead lines as per the Electricity Act, 2003.

The matter may be treated with grave importance considering the gravity of the issue and for the sake of safety and security of the human lives & property from the danger of electrocution and an estimate may be sent to the CE(Dist.) with copy to CE(safety) by 30.9.2021.
