Subject : Guidelines for reporting and submission of Insurance Claim

It is observed that our different offices are not always fully aware of all issues related to reporting and submission of insurance claims against various losses of insured assets of our company. It has been experienced that reporting and recovery of the losses of insured assets are being affected due to lack of awareness and non submission of documents in time to the Corporate Insurance Department. In most of the cases, after survey of the damaged sites/equipments, desired documents of the surveyor are not available within a reasonable period of time which may lead to termination of our claims at the surveyor's as well as insurer's end due to time bar. As a result of which losses remain unrecovered and may invite serious audit observations.

Under this situation this is to mention for information of all concerned that following major assets in different locations are presently under insurance coverage;
