Preface

More an employee acquires experience, more he becomes capable of performing jobs with higher responsibility and greater degree of criticality. In order to give such an employee an opportunity for his growth and also to utilise his capabilities gainfully for the benefit and development of the Company, promotion is an effective tool that one can ever overemphasize. An attempt to lay down certain broad principles through framing a policy is just to disseminate the ideas and expectations of the Board and maintain transparency in the process and system so that neither equity nor equality is compromised at the cost of the other and an employee is granted promotion only when he deserves it.
